Clearwater, FL.

Profile

Ambitious and resourceful software engineer that enjoys a challenge whether that comes in the form of performance critical architectural designs or team tech lead role.

Experience

SOFTWARE ENGINEER, DAIFUKU WYNRIGHT; CLEARWATER, FL – 2021 - PRESENT

Served as a senior resource specialized in communication gateway software for routing all traffic between interconnecting warehouse systems. Other responsibilities included mentoring junior engineers and serving as a tech lead for targeted R&D efforts.

SOFTWARE ENGINEER, WEST POINT INSURANCE UNDERWRITERS: PINELLAS PARK, FL – 2021-2021

Responsible for modernizing Legacy VB systems bringing them to .Net core solutions while implementing an advanced hybrid data access layer.

FULL-STACK SOFTWARE ENGINEER, DOCUPHASE: CLEARWATER, FL – 2019-2021

Tasked with creating multiple integral parts of the core data access layer and utilities for migrating server environments. Transitioned to an integrations team lead responsible for optimizing the code base from all various ERP systems integrations providing a streamlined product offering and implementation.

MOBILE ENGINEER, ALPS SOUTH ; ST. PETERSBURG, FL – 2017-2018

Tasked with creating and architecting a joint effort between technical resources and the R&D team to comply with a joint research grant from USF. The application aimed to collect medical data on amputees via multiple PLCs using Bluetooth.
